

THE ULTIMATE PROTECTION FOR YOUR SIP STRUCTURES

Structure Shield⁺ is a value-added upgrade for SIP envelopes which incorporates a factory applied zinc borate treatment designed to shield your structures from moisture, decay & insects .

Climactic zones where potential for wood decay damage is considered significant.

Shield Your Envelopes For the Long Haul with Structure Shield⁺

- Protect OSB against biological elements including fungal decay.
- Ensure the long-term durability of OSB in regions where wood boring/eating insects are prevalent.

Structure Shield⁺ Offers Increased Protection Through

- **Zinc Borate Treatment:** An integral treatment allowing for even disbursement throughout the entire sheet of OSB .

The Structure Shield⁺ Difference

- Unlike other treatments Structure Shield⁺ is applied as dry powder during the OSB manufacturing process for uniform distribution. Other treatments are topical surface treatments, not distributed throughout the OSB.
- **Warranted:** OSB treatment complements Premier's impressive panel warranty.
- **Cost Effective:** Zinc Borate treated OSB is less expensive than pressure-treated plywood.
- **Safe:** Safe for people, pets and the environment.
- **Proven Durability:** Formula has more than 20 years of lab, field research and results.

West-Eco Panelized Building Systems

WEST-ECO

WEST-ECO Panelized Building Systems offers extensive experience within the Construction Industry utilizing **STRUCTURAL INSULATED PANELS** as an alternative framing solution.

WEST-ECO specializes in the supply of SIPS and **Panelized Building Systems** for projects ranging from Residential, Commercial to Multi-Family Projects that are pre-fabricated as per your design and are shipped to your site ready to be assembled.

Structural Insulated Panels have been utilized by the Commercial Building Industry for over 35 years, however SIPs are relatively new to the Residential Sector which leaves many highly qualified Contractors and Skilled Builders unfamiliar with the uses and assembly techniques required to effectively and efficiently build with **SIPS**.

WEST-ECO offers experienced and professional staff to help with your transition to building with pre-framed **SIPS** and **Pre-Framed Panelized Building Systems**. Whether it's a question regarding assembly, a site meeting required for a delivery and assembly start up, or a meeting with an Engineer to determine the structural loads required. **WEST-ECO** has the experience and the ability to provide you with the assistance that will be required to make your project successful.
